Work Experience

Quantaa.Club **Feb 2025 - present**
Full-Stack Engineer (Founding Team) · Part-time *Remote*

- **Leading development** of Quantaa's MVP application, with direct responsibility for architecture decisions and implementation strategy across the full technology stack.
- Established a comprehensive **development roadmap** by translating product requirements into **actionable tasks**, defining **API contracts** and database schemas, and implementing the **React-Native** frontend, significantly enhancing functionality and user experience.
- Built a **custom authentication strategy** utilizing Firebase and optimizing user onboarding and database management, resulting in a **30% reduction in login latency** and **improved session reliability**.
- Designed a **role-based access** and content governance with **PayloadCMS** with **Postgres** to support admin and moderator flows for the LMS backend, aligning schemas with app needs.
- Created Docker image configurations and automated deployments via **GitHub Actions** CI/CD pipelines to **Amazon ECR**, generating semantic version tags and **reducing deployment time by 65%**.

Paraheights Technologies **Apr 2024 - Jul 2024**
Frontend Developer Intern *Gurugram, IN*

- **Orchestrated** the migration of the company's internal website to **Next.js**, improving the scalability and performance of the platform.
- Coordinated with the design team in an **agile environment** to ensure **design consistency** during the transition, **code efficiency**, reusability, and optimization by 25% through an enhanced development workflow.
- Built an internal document editor with a rich text editor and spreadsheet capabilities for the **improve document management and collaborative editing** by utilizing Handsontable and Tiptap libraries, used daily by 10+ employees.
- **Optimized** application performance by utilizing React-query and Zustand for efficient data fetching and managing states with secured API calls, **resulting in a 30% reduction in server response time** and leading to a better user experience with **responsive design** implementation across the platform.

Projects

CVCompass: AI resume screening tool for jobseekers & hiring teams | Project Link
Node.js, Huggingface API, Redis, Next.js

- **Developed** a resume screening tool similar to an application tracking systems' scanners, integrating **large language models** to evaluate the candidate's resume against job requirements, achieving 90% accuracy in matching resumes.
- Incorporated **Llama3** and **Deepseek R1 distill** models from Hugging Face to generate results of candidates' strengths and job relevancy, delivering actionable feedback that improved candidates' resume quality by 30% based on user-reported outcomes.
- Deployed the application using Render and Openstatus monitoring, delivering high performance, and **99.9% uptime** for users.
- Gained over **80+ monthly visitors** and positive feedbacks across Product Hunt and other community-based platforms.

NoSpam: A comprehensive text analysis tool | Project Link
Python, Nltk, Scikit-learn, Javascript, React

- **Designed** a robust tool for spam messages/email detection system and speech-to-text analysis for addressing content moderation needs for a platform. Achieved **97% accuracy**, of the trained classification (RandomForestClassifier) model.
- Implemented a full-stack responsive solution using **React**, **TailwindCSS** for the frontend and utilized **Python**, **Flask**, **NLTK**, and **Scikit-learn** for the machine learning backend.
- Hosted the application backend using **AWS Elastic Beanstalk**, maintained a **scalable deployment** delivering **99.5% uptime** and scalability to handle 1,000+ concurrent users without performance degradation.

Skills

Programming Languages	HTML, CSS, Javascript, Python, SQL, C++
Frameworks	React, Node.js, Express, FastAPI, LangChain/LangGraph
Tools and Platforms	Git, REST APIs, PostgreSQL, Docker, CI/CD
Development Practices	Agile/Scrum, Responsive Design, Accessibility, Unit/Integration Testing

Education

Maulana Abul Kalam Azad University Of Technology **Nov 2020 - Jun 2024**
Bachelor of Technology in Information Technology; CGPA: 8.5 *Kolkata, IN*

Activities

- Pragati Techfest 2024 — Lead organizer for Mckvie's annual techfest impacting 280+ attendees. Mar 2024
- Smart India Hackathon 2023 — Ranked among 10,000 teams out of 49,000 teams across India. Oct 2023
- Hack the Mountains Hackathon — Semifinalist among 3,000+ participants globally. Sep 2022
